

PRE-CONFERENCE WORKSHOPS

WORKSHOP 1: SURGICAL PRECISION AND SUCCESS

Thursday, June 19, 10:00 AM

A theoretical, practical, and hands-on workshop covering a broad range of craniofacial applications (ear, nose, and eye region). Topics include surgical planning, implantology, soft tissue management, and postoperative care. The session allows for case-based discussions, featuring best-practice examples and practical tips & tricks.

Dr. Matthias Ureel is an Oral and Maxillofacial Surgeon at the University Hospital Ghent (Belgium), specializing in reconstructive and aesthetic surgery, with a particular focus on head and neck reconstructions and interventions.

University Hospital Ghent

Thursday, June 19, 2:00 PM

WORKSHOP 2: PROSTHETIC PERFECTION AND SUCCESS

Maarten de Jong
University Hospital Maastricht

A practical and theoretical, case-based workshop covering nasal prostheses. This session offers direct insights into prosthetic planning, workflows, and valuable tips & tricks to achieve the best possible outcome for your patient's prosthesis.

Mr. De Jong treats patients throughout the Netherlands and Belgium. He has gained extensive expertise and is internationally recognized for his numerous lectures and expert contributions.

Workshops are sponsored by **BioComp's AHEAD Implant System** and **Steco**. Both sessions include a presentation on the Steco Magnet System and its key features. The surgical workshop concludes with a hands-on session using the AHEAD Implant System on prepared models.

JUNE 19-21, 2025

AMSTERDAM, NETHERLANDS

Why Attend?

Enhance your expertise in craniofacial rehabilitation through practical, case-based, and hands-on training led by experts. Whether you're focused on prosthetic perfection or surgical precision, these workshops offer invaluable knowledge and experience.

Gain Expert Knowledge

Explore case diagnostics, planning, and treatment principles for implant-based craniofacial prosthetic rehabilitation – including complex cases involving the nose, ear, and eye region.

The AHEAD Implant System and Steco Magnet Solutions

Develop a detailed understanding of the AHEAD Implant System, including surgical protocols, prosthetic treatment options, workflows, and various Steco magnet solutions for facial prosthetic retention.

Additional Information:

- Places are limited, and pending confirmation.
- Included: Coffee breaks and lunch.
- Location: Van der Valk Hotel Amsterdam Zuidas, Netherlands.
- Language: English (translation options available).
- All conference participants will receive a certificate of attendance.
- To ensure an interactive and insightful workshop, places are limited!
- Exclusive Conference Discount: Get 20% off (Distributor Network participants).
- Special Rate for Resident Surgeons: €175.
