

# **CranioFacial Reconstruction Conference: The Nose**

# **PROGRAM**

# CranioFacial Reconstruction Conference: The Nose

## PROGRAM

### Thursday June 19th

- 09.00 WORKSHOP 1: Surgical precision and success by Dr. Matthias Ureel
- 13.30 WORKSHOP 2: Prosthetic perfection and success by Maarten de Jong
- 18.00 Welcome reception

### Friday June 20th

- 09.00 Welcome
- 09.15 Keynote speaker: Prof. dr. dr. P. Kessler: The nose – a challenge in facial reconstruction
- 10.00 Mrs. Caro Verbeek: On the Nose – on Changing Beauty Ideals
- 10.25 Coffee break
- 10.45 Dr. Kilian Kreuzer and Mrs. Yvonne Motzkus: Anaplastological and surgical challenges in nasal prostheses with special consideration of midface defects
- 11.30 Dr. Nicole Kellener -Smeets: Skincancer around the nose
- 12.00 Lunch break and meet the experts
- 12.40 Mrs. Nathalie Vosselman: Guided Implant Techniques for Nasal Prostheses: 3D Planning and Prosthetic Driven Workflow
- 13.05 To be confirmed
- 14.45 Dr. Luciano Dib and Prof. Dr. Rodrigo E. Salazar Gamarra: The +ID workflow for nasal epithesis planning and execution
- 15.05 Dr. Thibault Dedier and Mrs. Anne-Marie Riedinger: The Benefits of Perioperative Prostheses in Nasal Reconstructions
- 15.50 Dr. Sat Patmar and Stefan Edmondson: The Birmingham way to manage patients for Nasal prosthetics
- 16.15 Meet the experts
- 16.30 End of the day program
- 18.30 Dinner Pensant
- 21.30 End Dinner Pensant

\* Program subject to change

In 2025, we proudly present the first edition of the **Craniofacial Reconstructions Conference** – a unique platform where surgeons and anaplastologists unite to focus on the latest advancements in craniofacial reconstruction. Location is the beautiful city Amsterdam. Our goal is to **bridge the gap between disciplines**, fostering collaborative, groundbreaking solutions for patients. By bringing together experts from these specialized fields, we create an environment that inspires, innovates, and drives progress within the sector.

# CranioFacial Reconstruction Conference: The Nose

## PROGRAM

### Saturday June 21th

- 09.00 Tjitske Bannink: From art to algorithm: advancing nasal prosthesis design with statistical shape modeling
- 09.25 Dr. Mark Fischer and Mr. Juan Carlos Garcia: Nasal Prosthetic Rehabilitation: The Johns Hopkins Experience and Future Directions
- 09.45 Mrs. Gillian Duncan: The Impact of Anatomical Defects and Bone-Anchored Implants on the Design of the Epithetic Nasal Base and Nostrils
